1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor componente of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.
